## PROFILE SUMMARY

---

A dedicated front-end developer with more than **2 years** of expertise in React.js, React-Native JavaScript, HTML, CSS and JSON. Specializing in crafting visually stunning applications, I am committed to continuous learning and delivering innovative solutions that seamlessly blend functionality with an enhanced user experience.

## WORK EXPERIENCE

---

**SAG Corps Technology, Kanchipuram**

**June 2022 - Dec 2022**

INTERN

- Developed a music player using the React-Js(spotify-api).
- Comprehensive audio playback functionality.
- Developed small sized applications and learned **react hooks**.
- Todo list using the react-js , and expense tracker application using the **useReducer hook**.
- Developed **redux** based application and Deployments using the **netlify** and **GitHub** .

**SAG Corps Technology. Projects Overview**

**2023 – Present**

React-Js Developer

### Internal Project (Uplay)MusicPlayer Android application

- Developed an offline **music player**(Uplay) in React Native.
- Utilized the **TrackPlayer** package for comprehensive audio playback functionality.
- Implemented side effect **handling hooks** to manage asynchronous operations effectively.
- Incorporated optimizations, including performance enhancements and code optimization.
- Ensured seamless offline playback experience for users.

### Client Project 1 (AdssLab) [visit site](#)

- Utilized WordPress for hosting, Html,Css,Js,Bootstrap5 using to develop.
- PHP for mailing functionality.
- Dedicated static website for medicine selling.
- Met client's requirements satisfactory.

### Client Project 2 (OrderFlow)-Ongoing

- Enhanced Order Processing and Asynchronous Operations.
- Implemented a streamlined order flow and Redux Toolkit for efficient state management.
- Incorporated Redux Saga for handling complex order transactions, ensuring responsiveness and reliability.
- Implemented performance optimizations for smooth, responsive application on limited resources.

- Developed custom React Hooks and custom components for efficiency and maintainability, promoting code reusability and encapsulating complex logic.
- Achieved full dynamic optimization by implementing CRUD operations asynchronously through Redux-Saga, ensuring efficient and responsive functionality.

## EDUCATION

---

**INDO AMERICAN COLLEGE , Cheyyar (Cgpa 7.8 %)**

2022

Bachelor of Applied Science(B.sc) – Information Technology

## TECHNICAL SKILLS

---

**Languages** : JavaScript, Typescript, Python(basics).

**Libraries** : ReactJS, React-Native.

**Database** : FireBase.

**WebTechnologies**: HTML,CSS,Javascript,Bootstrap.

**Operating Systems** : Linux, Windows.

**Versioning Tool** : Git, Git-Hub.

**Development IDE** : VS Code , Atom.
